

Press release

## **Fit for the future with efficient and flexible heroal system solutions**

**At FENSTERBAU FRONTALE 2026 heroal will be presenting its comprehensive product portfolio for versatile applications, flexibility, fabrication efficiency and design freedom**

**Verl, January 2026. As a full-service provider of aluminium systems for the building shell, at FENSTERBAU FRONTALE 2026 heroal will be presenting innovative and sustainable solutions that offer fabricators, architects, planners and builders added value across the core areas of modern construction. Hall 7A, Stand 317 of the trade show will be focussed on design, flexibility and exceptionally efficient systems that are easy to fabricate. Besides the innovations in window, door and curtain wall systems, the company will also be presenting itself as a sustainable partner with its expanded range of solutions from the heroal roller shutter and sun protection portfolio.**

Creating the building of tomorrow today: under the motto "spaces for life", at FENSTERBAU FRONTALE 2026 heroal will be presenting innovative, high-quality and sustainable complete solutions that set themselves apart through premium quality, industry-leading customisation options and services in every phase of the building life cycle. With a focus on the key issues facing the industry, heroal aluminium system solutions offer unique benefits in terms of design, sustainability, security, comfort and flexible application, and create added value thanks to maximum efficiency in planning and fabrication.

### **Windows, doors and curtain walls: design freedom and efficiency perfectly combined**

By using heroal window, door and curtain wall systems, heroal specialist partners benefit from simple planning and the highest quality "made in Germany". heroal system solutions are defined by durable surfaces in heroal hwr powder coating, a unique range of colours and individual design options. What's more, the use of aluminium creates systems without compromise that guarantee maximum longevity and recyclability. In addition, the possibility of adding to the portfolio as well as involvement in tenders with a broad range of requirements generates growth potential for window and door manufacturers. For smart

planning and ordering as well as the efficient, reliable execution of projects, heroal also supports the complete integration of its system solutions in Klaes, Picos and Logikal.

heroal will prove just how easy and efficient fabrication can be in a special workshop area at FENSTERBAU FRONTALE: as part of live demonstrations, the company will present the benefits of the Easy Mount (EM) technology based on the heroal VS Z EM clamp-on sun protection as well as the heroal D 72 PF EM door system, whose optimised construction saves work steps and material during door fabrication and whose exceptional ease of fabrication reduces throughput times in the workshop by up to 20%. Fabricators benefit from the refined system logic of the heroal D 72 door system as well as the countless fitting and design options that are specifically tailored to the requirements of the front door market.

Another solution designed to provide added value for fabricators is heroal plus, the innovative accessories package for the heroal W 72 and heroal W 77 window systems, which will be presented at FENSTERBAU FRONTALE in the heroal W 77 plus version. Its modular structure includes a heroal VS Z textile screen, an anti drop device, an integrated insect screen as well as a windowsill for a complete, end-to-end solution from a single supplier. All options are available individually in different combinations or for retrospective integration in the building shell.

At FENSTERBAU FRONTALE fabricators will also have the chance to see the exceptional versatility of the heroal W 72 window system for themselves based on the example of a stairwell curtain wall. heroal W 72 makes it easy to install curtain walls for stairwells and gives heroal specialist partners valuable additional benefits in comparison to other available systems. Besides easy, efficient fabrication, this includes the possibility of implementing large element sizes with a low overall weight as well as individual curtain wall design, including special shapes and sizes.

### **Roller shutters, sun protection and accessories – one partner, every system**

As an end-to-end system provider, heroal offers its partners carefully coordinated solutions all from one place. In addition to heroal window, door and curtain wall systems, the company also develops and produces systems for roller shutters, sun protection, roller doors, fire and smoke protection solutions as well as accessories such as insect screen solutions, windowsills and anti drop devices. heroal has therefore positioned itself as a *one-stop*

partner for *all* systems that covers the entire building. The heroal product portfolio can be flexibly combined to create high-quality complete solutions, including special solutions where needed.

Thanks to cutting-edge manufacturing with its own coating, curtain and textile production and efficient roll forming technology, the company's solutions offer maximum vertical integration and the highest quality. To respond to customer requirements even faster, heroal has now integrated the assembly of its sun protection solutions into its in-house manufacturing. The company is therefore perfectly positioned to meet short delivery times, particularly when it comes to high-demand textiles. Orders can be placed quickly and easily using the heroal Business Configurator interface in Klaes and Logikal – precisely tailored to every customer requirement with perfectly coordinated delivery, whether as system products, kits or prefabricated elements.

heroal will be presenting the exceptional versatility and flexible applications of heroal system solutions at FENSTERBAU FRONTALE with exhibits for installing the shading solutions in different window systems. The exceptional portfolio depth with solutions for a wide range of applications and extension stages as well as the modular construction creates valuable added benefits for heroal partners. No matter whether aluminium, PVC, wood or hybrid windows – heroal roller shutter and sun protection systems let you design and plan integrated complete solutions with absolute freedom.
